

Ref number A/A	Session title	chair - convenor	Full affiliation	E-mail address:	co-chair	Full affiliation	E-mail address	Session Topic
CA01	Advances in Nano-inspired Applications of Electromagnetics in Medicine and Biotechnologies	Ovidio Mario Bucci	Department of Biomedical, Electronic and Telecommunications Engineering, University of Naples Federico II	bucci@unina.it	Yahya Rahmat-Samii	Electrical Engineering Department, University of California, Los Angeles (UCLA), CA, USA	rahmat@ee.ucla.edu	Interaction between EMF and nanocomponents. External and in-body exposition and controlling systems. Exploitation of nano and micro components in EMF hyperthermia and imaging. Remote control of nanomachines and biological processes.
CA02	Recent Advances and Applications of Body-Centric Wireless Communications	Ito Koichi	Director, Research Center for Frontier Medical Engineering, Professor, Department of Medical System Engineering	ito.koichi@faculty.chiba-u.jp	Yang Hao	Queen Mary University of London	yang.hao@eecs.qmul.ac.uk	Antennas, Radio Propagation, Computational Electromagnetics
CA03	European Workshop on Conformal Antennas (EWCA)	Zvonimir Sipus	Faculty of Electrical Engineering and Computing	zvonimir.sipus@fer.hr	Peter Knott	Fraunhofer Institute for High Frequency Physics and Radar Techniques FHR	peter.knott@fhr.fraunhofer.de	Conformal Antennas and Conformal Antenna Arrays
CA04	Convened session of the EuRAAP WG on Software	Guy Vandenbosch	Katholieke Universiteit Leuven, Dep. Electrical Engineering – ESAT/TELEMIC	guy.vandenbosch@esat.kuleuven.be	Francesca Mioc	SATIMO Italy	francesca.mioc@libero.it	Computational Electromagnetics, Software development, standardisation, EDX/EDI, cooperation between academia and software vendors
CA05	Leaky-Wave Antennas	David R. Jackson	Department of ECE, University of Houston	djackson@uh.edu	Alessandro Galli	Sapienza University of Rome – Department of Information Engineering, Electronics and Telecommunications	galli@die.uniroma1.it	Leaky-wave antennas, Fabry-Pérot resonant cavity antennas, systems employing leaky-wave structures.

Ref number A/A	Session title	chair - convenor	Full affiliation	E-mail address:	co-chair	Full affiliation	E-mail address	Session Topic
CA06	Reconfigurable Antenna Arrays Theory, Implementations, and Applications	Paolo Rocca	ELEDIA Research Center @ DISI – University of Trento	paolo.rocca@disi.unitn.it	Tommaso Isernia	University of Reggio Calabria Italy	tommaso.isernia@unirc.it	Nowadays, the interest in reconfigurable arrays is broad and it ranges from academic to industrial researchers involved both in civil and military projects. Accordingly, this special session is aimed at highlight the latest advances in the framework of reconfigurable arrays and is intended at highlighting current solutions at four different levels: System architectural level; Theoretical/Methodological level; Technological Level; Applicative Level. Accordingly, the special session will focus on innovative strategies and future trends including, but not limited to Beam forming; Adaptive arrays for rejection of RF interferences, jammers, and clutters; Dynamic arrays and time dependent array apertures; Beam-steering control (e.g., phaseshift steering, time-delay steering); Signal processing; Passive and active microwave circuit technology; Analytic, deterministic, and stochastic approaches for the synthesis of reconfigurable arrays; Simplified and cost effective architectures for reconfigurable arrays (e.g., subarrays, overlapped arrays); Broadband and ultra wideband reconfigurable arrays; Multiple input, multiple output (MIMO) reconfigurable arrays; Spatial and polarization diversity in reconfigurable array design; Ad-hoc control strategies for large array antennas; Numerical analysis/design of reconfigurable arrays; Reconfigurable arrays for remote (near-field, far-field) sensing, communications, commercial applications, radio
CA07	Imaging Arrays for Space and Astronomy	W.A. van Cappellen	Chalmers University of Technology / ASTRON	cappellen@astron.nl	A. van Ardenne	Chalmers University of Technology / ASTRON	ardenne@astron.nl	Receiving antenna arrays, focal plane arrays, radio astronomy, THz imaging arrays, manufacturability, composite reflectors, decade bandwidth feeds
CA08	Non-Foster Active Metamaterials: Theory, Design and Applications	Silvio Hrabar	Faculty of Electrical Engineering and Computing (FER), University of Zagreb	Silvio.Hrabar@fer.hr	Yang Hao	Queen Mary University of London	yang.hao@eeecs.qmul.ac.uk	Antennas, Metamaterials, Non-Foster Circuit
CA09	60GHz and Beyond: Antennas and Their Integration	Thomas Zwick	Karlsruhe Institute of Technology (KIT)	Thomas.zwick@kit.edu	Zhi Ning Chen	Institute for Infocomm Research	chenzn@i2r.a-star.edu.sg	integrated miniaturized mmW antennas – off-chip and on-chip, substrate integrated antennas, antennas in LTCC, packaging solutions for highly integrated mmW transceivers
CA10	Mm-Wave Antenna-Systems	Cyril Luxey	University of Nice-Sophia Antipolis	Cyril.luxey@unice.fr	Jiro Hirokawa	Tokyo Institute of Technology	jiro@antenna.ee.titech.ac.jp	Mm-wave Antenna-Systems

Ref number A/A	Session title	chair - convenor	Full affiliation	E-mail address:	co-chair	Full affiliation	E-mail address	Session Topic
CA11	Transformation Electromagnetics in Antenna Engineering	Douglas Werner	Professor of Electrical Engineering, 211A Electrical Engineering East, The Pennsylvania State University	dhw@psu.edu	Yang Hao	Queen Mary University of London	yang.hao@eecs.qmul.ac.uk	Antennas, Transformation Electromagnetics, Metamaterials
CA12	Compressive Sensing in Electromagnetics – State of the Art and Recent Advances	Andrea Massa	ELEDIA Research Center @ DISI – University of Trento	andrea.massa@ing.unitn.it	Giacomo Oliveri	ELEDIA Research Center @ DISI – University of Trento	giacomo.oliveri@disi.unitn.it	The topics of main interest include, but are not limited to Compressive Sensing as applied to Antenna Synthesis and Design; Compressive Sensing as applied to Electromagnetic Measurements; Compressive Sensing as applied to Electromagnetic Signal Processing; Compressive Sensing as applied to Remote Sensing; Compressive Sensing as applied to Inverse Scattering and Microwave Imaging; Compressive Sensing as applied to Wireless Communications; Compressive Sensing for Biomedical Imaging Techniques.
CA13	Numerical Modeling of Periodic Structures and Metamaterials	Stefano Maci	Department of Information Engineering	macis@dii.unisi.it	Raj Mittra	Electrical Engineering Department	mittra@engr.psu.edu	Computational Electromagnetics
CA14	Domain Decomposition Methods	Giuseppe Vecchi	Deaprtment of Electronics, Politecnic of Turin	vecchi@polito.it	Stefano Maci	Department of Information Engineering	macis@dii.unisi.it	Computational Electromagnetics
CA15	Integral Techniques for Electromagnetics (INTELECT)	Juan Mosig	Ecole Polytechnique Fédérale de Lausanne (EPFL), Switzerland	juan.mosig@epfl.ch	Angelo Freni	Univ. of Florence	freni@unifi.it	
CA16	RFID's, mmID's and Power Scavenging: Status and Challenges	Manos Tentzeris	Georgia Tech	etentze@ece.gatech.edu	Apostolos Georgiadis	Senior Researcher CTTC	apostolos.georgiadis@cttc.es	MMID , RFID & Sensors
CA17	Small Antennas	Richard W. Ziolkowski	Dept. of ECE, University of Arizona	ziolkows@ece.arizona.edu	Cyril Luxey	University of Nice-Sophia Antipolis	Cyril.luxey@unice.fr	new knowledge gathered by the European and non-European antenna communities
CA18	UWB Antenna Arrays for Sensing Applications	Alexander Yarovoy	Delft University of Technology	a.yarovoy@ewi.tudelft.nl	Alessandro Galli	Sapienza University of Rome – Department of Information Engineering, Electronics and Telecommunications	galli@die.uniroma1.it	The session intersects on three topics that are: - antenna arrays for future generation radar; - antenna arrays for short-range imaging (e.g., medical, through-the-wall, concealed weapon detection); - sparse arrays for radioastronomy
CA19	UWB/mm-Wave MIMO Radar-Systems and Applications	Reiner S. Thomä	Ilmenau University of Technology, Electronic Measurement Research Laboratory	Reiner.Thomae@tu-ilmenau.de	Alexis Paolo Garcia Ariza	Ilmenau University of Technology, Electronic Measurement Research Laboratory	alexis-paolo.garcia-ariza@tu-ilmenau.de	Ultrawideband/millimeter-wave multi-antenna systems. MIMO radar architectures. Polarimetric analysis. High resolution MIMO signal processing and imaging. Implementation issues (MMIC, packaging, antennas).

Ref number A/A	Session title	chair - convenor	Full affiliation	E-mail address:	co-chair	Full affiliation	E-mail address	Session Topic
CA20	Microwaves in Medical Diagnostics and Treatment	Andreas Fhager	Dept. of Signals and Systems, Chalmers University of Technology	Andreas.Fhager@chalmers.s e	Ian Craddock	University of Bristol United Kingdom	ian.craddock@bristol.ac.uk	All aspects of microwave based applications in medical diagnostics and treatment.
CA21	The New Frontier of Clinical Therapies: Bioeffects and Engineering Issues of Electromagnetic Nanopulses	Francesca Apollonio	Sapienza of Rome, Department of Information Engineering, Electronics and Telecommunications	apollonio@die.uniroma1.it				History, overview of bioeffects and potential future application of nanopulses Engineering issues for the development of nanopulses technology Generators and applicators for electromagnetic nanopulses Microdosimetry Molecular simulations and laboratory experiments for the clarification of the interaction mechanisms
CA22	Non-uniform Array Antennas	Ioan E. Lager	Faculty of Electrical Engineering, Mathematics and Computer Science, Delft University of Technology	i.e.lager@tudelft.nl	Andrea Massa	ELEDIA Research Center @ DISI – University of Trento	andrea.massa@ing.unitn.it	

Ref number A/A	Session title	chair - convenor	Full affiliation	E-mail address:	co-chair	Full affiliation	E-mail address	Session Topic
CP01	Novel Methods in Radio Channel Modelling for Smart Environments	Claude Oestges	ICTEAM UCL (Université catholique de Louvain)	claude.oestges@uclouvain.be	Alain Sibille	TELECOM Paris Tech	alain.sibille@telecom-paristech.fr	wireless propagation, channel models
CP02	Joint Antenna-Channel Issues in Body Area Networks (supported by COST IC1004)	Raffaele D'Errico	CEA-LETI	raffaele.derrico@cea.fr	Joseph Wout	Ghent University/ IBBT	wout.joseph@intec.ugent.be	Joint antenna-channel issues for WBANs WBAN propagation On-body channel modelling In-body, and in-to-out body channel modelling Off-body and Body-to-Body channel modelling Antennas for WBANs: on-, in- and off-body Antenna influence on WBAN radio channel Statistical modelling for WBANs Antenna and Channel measurement methodology in WBANs COST IC 1004 WBAN channel models Channel impact on WBAN performance
CP03	Prospects of Over-the-Air testing: Techniques, Progress, Results	Albert Heuberger	Director, Fraunhofer Institut für Integrierte Schaltungen	albert.heuberger@iis.fraunhofer.de				
CP04	Channel Modelling for Mobile SatCom and SatNav Systems (convened by COST IC0802)	Uwe Fiebig	DLR Institute of Communications and Navigation	uwe.fiebig@dlr.de	Fernando Fontan	ETSI Communications University of Vigo	fpfontan@tsc.uvigo.es	Propagation, Channel Modelling, Channel Assessment Techniques, SatCom, GNSS
CP05	Advances in Techniques, Instruments and Data for Propagation Campaigns (convened by COST IC0802)	Carlo Riva	DEI-Politecnico di Milano	riva@elet.polimi.it	Michael Willis	STFC Rutherford Appleton Laboratory	mike.willis@stfc.ac.uk	Propagation, Measurements, SatCom, Sat Nav, Numerical Weather Products
CP06	Approaches in Wireless Optical Propagation and Channel modelling for Free Space Optical Links	Carlo Capsoni	Politecnico di Milano	capsoni@elet.polimi.it	Erich Leitgeb	Institute of Broadband Communications, TU Graz	erich.leitgeb@tugraz.at	Free Space Optics (FSO), Channel Modelling on FSO, Optical Wireless, Wireless Optical Propagation, Atmospheric Influence on FSO and Light Propagation
CP07	Wave Propagation Modeling in Vegetated and Built-Up Areas	Thomas Kürner	Institut für Nachrichtentechnik Technische Universität Braunschweig (Institute for Communications Technology Braunschweig Technical University)	Kuerner@ifn.ing.tu-bs.de	Saúl A. Torrico	Comsearch	storrico@comsearch.com	Wave propagation through vegetation, wave propagation in vegetated residential environments, wave propagation in urban environments with isolated trees or parks, wave propagation modeling in vegetated and built-up areas, scattering from trees, scattering from buildings.
CP08	Future Radios for Medical and Daily Healthcare Applications	Katsuyuki Haneda	Department of Radio Science and Engineering, Aalto University School of Electrical Engineering	katsuyuki.haneda@aalto.fi	Jun-ichi Takada	Department of International Development Engineering, Tokyo Institute of Technology	takada@ide.titech.ac.jp	Interactions of antennas and human body Propagation and antenna modelling in medical and daily healthcare scenes Impacts of antennas and propagation characteristics on radio systems operated in medical and daily healthcare scenes

Ref number A/A	Session title	chair - convenor	Full affiliation	E-mail address:	co-chair	Full affiliation	E-mail address	Session Topic
CP09	Wireless Sensor Networks (WSNs) for Real Time and Distributed Remote Sensing	Andrea Massa	ELEDIA Research Center @ DISI – University of Trento	andrea.massa@ing.unitn.it	Federico Viani	ELEDIA Research Center @ DISI – University of Trento	federico.viani@disi.unitn.it	The topics of main interest include, but are not limited to Remote Sensing Biomedical Applications Industrial Applications Military Applications Indoor and Urban Propagation Models Multifrequency Antennas Optimization Methods in EM Design

Ref number A/A	Session title	chair - convenor	Full affiliation	E-mail address:	co-chair	Full affiliation	E-mail address	Session Topic
CM01	Precise measurements of Materials and Media in the MM/SubMM Ranges	V.V. Parshin	Applied Physics Institute, Nizhny Novgorod, Russia	parsh@appl.sci-nnov.ru	Cornelis G. van 't Klooster	European Space Agency, Estec, Noordwijk, The Netherlands	Kees.van.t.Klooster@esa.int	Precise measurement of reflection or transmission parameters of materials, precise atmosphere absorption measurement in absorption lines and continuum with respect to applications (Precise Antennas Reflector, High power applications - ITER, remote sensing of atmospheric constituents and earth covers)
CM02	Wave and sub-mm Waves RCS and Scattered Field Measurements	Claire Migliaccio	University of Nice Sophia Antipolis – Electronics and Telecommunications Laboratory-LEAT	claire.migliaccio@unice.fr	Alexander Yarovoy	Delft University of Technology	a.yarovoy@ewi.tudelft.nl	The session intersects on three topics that are: - mm- and sub-mm-Waves; - RCS and diffraction; - Measurements
CM03	Antenna Diagnostics and Post-processing (AMTA convened session)	Doren W. Hess	MI Technologies	dhess@mi-technologies.com	Lars Jacob Foged	SATIMO	lfoged@satimo.com	
CM04	Recent Technical Advances in Antenna Test Systems (AMTA convened session)	Carlo Rizzo	Tecnologica Ltd.	crizzo@tecnologica.co.uk	Daniel Janse van Rensburg	Near Field Systems Inc., USA	drensburg@nearfield.com	
CM05	Automotive/ Telematics Antenna Testing (AMTA convened session)	James D. Huff	The Howland Company, Inc	jhuff@thehowlandcompany.com	Dirk Heberling	RWTH Aachen University	heberling@ihf.rwth-aachen.de	
CM06	Portable Wireless Device Testing (AMTA convened session)	Manuel Sierra Castañer	Universidad Politécnica de Madrid	mscastaner@gr.ssr.upm.es	Vince Rodríguez	Product and Technical Manager, Antennas. ETS-Lindgren	Vince.Rodriguez@ets-lindgren.com	
CM07	Aerospace Antenna Testing (AMTA convened session)	Sergey Pivnenko	Technical University of Denmark	sp@elektro.dtu.dk	Per Iversen	the Microwave Vision Group	piversen@satimo.com
